

Print Out Picture Frame - made to fit 4x6 photo

Best when printed on 110lb cardstock paper.

1. cut out around edges.
2. cut out white center
3. tape picture to back of frame.
4. cut out triangle and tape to back of frame like example shown below and fold to stand on table.
5. (alternate - you can also cut out blank cardstock the same size as frame to tape to the back after photo is attached but before attaching triangle.)

Example:
